

Feedback for EEE207 Session:2005-2006

Feedback: Please write simple statements about how well students addressed the exam in general & individual questions in particular including common problems/mistakes & areas of concern below. If not enough room, use a MSWord doc instead.

General Comments:

Looking at the answers to the questions, I realise that questions 1 & 4 were slightly more difficult than I intended. On the whole I am not too disappointed as the average is above 50% and some students did quite well in in.

Question 1:

This was a slightly more difficult question than in previous years. Students banking on this would have suffered as a result.

Question 2:

Fairly straightforward and most students got something from this.

Question 3:

Perhaps the easiest question and many students pulled up their average on this. There were many silly mistakes, especially on what the actual drain voltage was, but they seemed to know how to proceed.

Question 4:

Although this question is normally difficult, it seemed to be harder than usual this year. Virtually no one got correct marks in one or two bits, but the last part was simple and helped get most of the marks.

Question 5:

Question 6:

Question 7:

Question 8:
