

Examination Feedback for EEE206 – Communication Systems  
Spring Semester 2010-11

**Feedback for EEE206 Session: 2010-2011**

**Feedback:** Please write simple statements about how well students addressed the exam paper in general and each individual question in particular including common problems/mistakes and areas of concern in the boxes provided below. Increase row height if necessary.

**General Comments:**

Many answers were poorly presented in their layout, e.g. no space was left between questions, scrappy writing was difficult to follow.

**Question 1:**

Amplitude modulation question was well answered overall.  
No points to advise.

**Question 2:**

Part a – many did not know what the frequency spectrum of the wave looked like – they assumed it was the modulated waveform of the carrier.

**Question 3:**

Part b had not been asked in previous years and many had not revised the topic.

**Question 4:**

No obvious points here.
