

### **Feedback for EEE6420 Session: 2010-2011**

**Feedback:** Please write simple statements about how well students addressed the exam paper in general and each individual question in particular including common problems/mistakes and areas of concern in the boxes provided below. Increase row height if necessary.

**General Comments:**

Overall the calculation parts of the paper were well done but the bookwork fared worse indicating that students are not reading round on the subject.

**Question 1:**

Addressed noise problems in comms. Problem in part c well done but bookwork parts a and b very mixed.

**Question 2:**

Satellite system question. Again bookwork in Part a and particularly b showed many students had not read around the subject.

**Question 3:**

A descriptive question which required background knowledge of optical fibres. The more demanding parts related to the optical components (LED, LASER, Erbium Amp) which many had failed to revise.

**Question 4:**

Optical fibre transmission system question. Part a and b were bookwork and the answers were very mixed indicating students not reading the notes let alone books. Problem on an optical link well done overall.
