

EEE6200 – AC Machines

Geraint Jewell

g.jewell@sheffield.ac.uk

Background

- New course for 2014/15
- Split between Ken Mitchell and myself (50:50 or thereabouts)
- No past exam papers
 - We will prepare some sample questions to plug this gap
- All notes and other course material for my section will go on the Teaching Resources section of the EEE web-pages
 - May in due course also go on MOLE

Recommended reading (my section)

- Alternating Current Machines, M.G Say, Pitman International (Archived earlier editions on line)
- Electric Machines, Slemon and Straughan, Addison-Wesley, 1980
- Design of Rotating Electrical Machines, Juha Pyrhonen, Tapani Jokinen, Valeria Hrabovcova, John Wiley and Sons Ltd, ISBN 978-0-470-69516-6
