

Examination Feedback for EEE6420 – RF & Optical Telecommunications
Autumn Semester 2012-13

Feedback for EEE6420 Session: 2012-2013

Feedback: Please write simple statements about how well students addressed the exam paper in general and each individual question in particular including common problems/mistakes and areas of concern in the boxes provided below. Increase row height if necessary.

General Comments:

The quality of the answers was varied as ever. There are no specific areas that stand out for comment.

Question 1:

Popular question on satellite system and no part stood out as a weakness nor strength.

Question 2:

Antennas and noise were addressed in this question. Too many students failed to learn the topic of antennas and lossy components also caused many students problems in defining the noise factor.

Question 3:

Fibre optic communications attempted by most students. Nothing stands out as a particular problem.

Question 4:

Fewest students attempted this question probably because the material came at the end of the module. Students did not learn the operation of the components of the systems.
