

Examination Feedback for EEE412/6032 – Systems Architecture/Operating Systems
Autumn Semester 2009-10

Feedback for EEE412/6032 Session: 2009-2010

Feedback: Please write simple statements about how well students addressed the exam paper in general and each individual question in particular including common problems/mistakes and areas of concern in the boxes provided below. Increase row height if necessary.

General Comments:

None.

Question 1:

No particular comments.

Question 2:

The issue of the strong isolation afforded by virtual machines was missed by almost everybody.

Question 3:

The advantage of multiple register sets of speeding context switching was generally poorly answered and produced a number of confused responses.
Similarly, the advantages of splitting a process into multiple threads received some answers.

Question 4:

Generally well-answered.
